A dark Halloween

The waning gibbous Moon (about 63% lit) does not rise until about 11 p.m. in most cities, so trick-or-treat hours have no moonlight. Bring a flashlight or glow sticks.

An extra hour after

Clocks fall back at 2 a.m. on Sunday, Nov. 1, so the night after Halloween is 25 hours long. Sunset on Sunday comes about an hour earlier on the clock.

Your town's hours

Many cities and towns set official trick-or-treat hours. Check your local government's announcement; this table only shows when it gets dark.
