 Cold Moon Monday, December 13	11:09 a.m.	10:09 a.m.	9:09 a.m.	8:09 a.m.	

Times are the instant of full moon from the U.S. Naval Observatory, converted to local standard or daylight time (daylight saving time runs March 14 to Nov. 7, 2027). A date in small type means the full moon falls on a different calendar day in that zone. Names follow the Old Farmer's Almanac; there is no blue moon in 2027.
